

Abstract

Our students can study in an easily accessible suburban environment with the help of a youthful, energetic faculty. Our methods are playful and our main goal is to add positive experiences to the acquired knowledge.

The training of our athletes and IT staff is also state-of-the-art and practice-oriented, with plenty of sports equipment and well-equipped computer rooms. In both disciplines, one can obtain a marketable profession within a year from graduation. Since April 1999 we have been an ECDL examination center.

Our Physical Education teachers are excellent professionals, with numerous city and national championship victories under their belts in handball, basketball and volleyball. Celebrities such as the forward in the Hungarian national team, or one of the great hopes of Hungarian men's tennis, already eleven times Hungarian champion at the age of 17, have come from our institution.

Our goal is to educate valuable people who can stand their ground in adult life. To help with this, we offer two foreign languages (English and German), and anyone who wants to practice more can do so in the afternoon study room.

Our school has been a KIP National Network Certified School since May 11, 2018.

Students in our current PE classes can qualify as a fitness-wellness instructors (reg. num. 54 813 01) within 1 year of completing the final examination.

From September 2020, a 5-year training will provide qualifications for future fitness-wellness instructors (reg. num. 54 813 01) and sports coach (reg. num. 54 813 02).

A fitness-wellness instructor plans, organizes and conducts group and individual training in typical recreational sports facilities (fitness, wellness clubs, hotel departments, swimming pools, leisure centers, gyms, etc.). The activities are primarily aimed at improving the fitness of the population. In addition to leading the profession, an instructor also provides customer service tasks in the affected facilities. With sophisticated skills, an instructor is capable of teaching the most diverse exercise programs and effectively contribute to the operation of the facility.

Occupationally Qualified Jobs: Aqua Trainer, Aqua Fitness Trainer, Aqua Aerobics Trainer, Group Fitness Instructor, Fitness Aerobics Trainer, Exercise Trainer, Fitness Instructor, Conditioning Trainer, Sports Animator, Fitness Assistant, Wellness Assistant.

Other students in our current classes can earn software development (reg. num. 54 213 05) qualifications within one year of completing the Baccalaureate exam.

From September 2020, a 5-year training course will provide software development and testing (reg. num. 54 481 08) qualifications.

A software developer prepares the development of the software application, designs, codes and tests the applications.
